**Aachen/Hamburg, Germany, July 2024 – Last month, the world's leading engineering services provider FEV unveiled its new brand FEV aerospace. This week, the company moved into its own office. FEV's aerospace experts are now located in the "ZAL II" building extension of the Center of Applied Aeronautical Research in Hamburg-Finkenwerder. It has now been officially opened by the First Mayor of the Free and Hanseatic City of Hamburg, Dr. Peter Tschentscher.**

“The ZAL in Hamburg-Finkenwerder is the leading technological research and development platform for civil aviation in Germany,” says Dr. Christian Eschmann, Director Aerospace at FEV. “This is the perfect environment for us, especially as we are in close proximity to our customers. We are therefore very excited to be developing state-of-the-art solutions for the aerospace industry from our new office.”

FEV has been developing sustainable innovations and technologies in the fields of mobility, energy and software for over

40 years. Under the FEV aerospace brand, the company is bundling its engineering and consulting expertise to make an even more targeted contribution to the sustainability of the aerospace sector in the future. Environmentally friendly propulsion systems are just as much a part of FEV aerospace's portfolio as intelligent software solutions.

**About FEV**

**FEV has always pushed the limits.**

FEV is a globally leading engineering provider in the automotive industry and internationally recognized leader of innovation across different sectors and industries. Professor Franz Pischinger laid the foundations by combining his background in academia and engineering with a great vision for continual progress. The company has supplied solutions and strategy consulting to the world's largest automotive OEMs and has supported customers through the entire transportation and mobility ecosystem.

**As the world continues to evolve, so does FEV.**

That's why FEV is unleashing its technological and strategic expertise into other areas. It applies its forward thinking to the energy sector. And its software and system know-how will enable the company to lead the way making intelligent solutions available to everyone. FEV brings together the brightest minds from

different backgrounds and specialties to find new solutions for both current and future challenges.

**But FEV won't stop there.**

Looking ahead, FEV continues to push the limits of innovation. With its highly qualified over 7,100 employees at more than 40 locations globally, FEV imagines solutions that don't just meet today's needs but tomorrow's. Ultimately, FEV keeps evolving – to a better, cleaner future built on sustainable mobility, energy and software that drives everything. For the company's partners, its people and the world.
